

Next Steps After DAT12

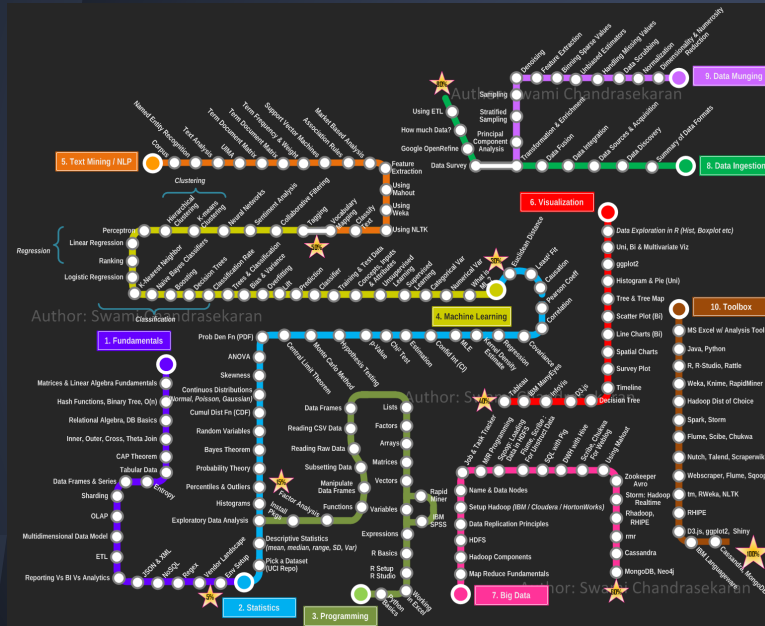

Alex Chao

A photograph of an iceberg floating in the ocean. The tip of the iceberg is visible above the water line, while the much larger, submerged portion is visible below. The sky is blue with some clouds, and the water is a deep blue. The text "Our Class" is written in yellow in the upper right, and "The rest of data science" is written in yellow in the lower left.

Data Science Roadmap

<http://www.analyticschampion.com/wp-content/uploads/2013/07/RoadToDataScientist1.png>

MODERN DATA SCIENTIST

Data Scientist, the sexiest job of 21st century requires a mixture of multidisciplinary skills ranging from an intersection of mathematics, statistics, computer science, communication and business. Finding a data scientist is hard. Finding people who understand who a data scientist is, is equally hard. So here is a little cheat sheet on who the modern data scientist really is.

MATH & STATISTICS

- ☆ Machine learning
- ☆ Statistical modeling
- ☆ Experiment design
- ☆ Bayesian inference
- ☆ Supervised learning: decision trees, random forests, logistic regression
- ☆ Unsupervised learning: clustering, dimensionality reduction
- ☆ Optimization: gradient descent and variants

PROGRAMMING & DATABASE

- ☆ Computer science fundamentals
- ☆ Scripting language e.g. Python
- ☆ Statistical computing package e.g. R
- ☆ Databases SQL and NoSQL
- ☆ Relational algebra
- ☆ Parallel databases and parallel query processing
- ☆ MapReduce concepts
- ☆ Hadoop and Hive/Pig
- ☆ Custom reducers
- ☆ Experience with xaaS like AWS

DOMAIN KNOWLEDGE & SOFT SKILLS

- ☆ Passionate about the business
- ☆ Curious about data
- ☆ Influence without authority
- ☆ Hacker mindset
- ☆ Problem solver
- ☆ Strategic, proactive, creative, innovative and collaborative

COMMUNICATION & VISUALIZATION

- ☆ Able to engage with senior management
- ☆ Story telling skills
- ☆ Translate data-driven insights into decisions and actions
- ☆ Visual art design
- ☆ R packages like ggplot or lattice
- ☆ Knowledge of any of visualization tools e.g. Flare, D3.js, Tableau

You guys are great!

- We covered a lot of material
- But hopefully now you have the confidence to apply data science to your own use cases

Where Do I Go From Here?

- Grad School in relevant field (CS, Stats, ML)
 - Berkeley (Go Bears!)
 - Two year online Masters in Data Science
 - 60k per year.... ouch
 - Stanford, CMU, MIT, etc.
 - Some offer certificate programs in specialized fields

Where Do I Go From Here?

Data Science for Social Good

<http://dssg.io/>

- 12 weeks in Chicago
- work in small teams on analytics project in partnership with nonprofits, local governments, or federal agencies
- full-time mentors and technical advisors

Where Do I Go From Here?

Startup.ML Fellowship <http://www.startup.ml/blog/fellowship>

- 4 months, project-focused
- Building a machine learning system from scratch
- **Free** and doesn't have hard requirements about having an advanced degree

Where Do I Go From Here?

- Another Bootcamp-like program
 - Galvanize www.galvanize.it/education
 - GalvanizeU - 1 Year Masters (Ask Alessandro!)
 - Galvanize Immersive - 12 weeks full time
 - 16k for immersive, 48k for Masters
 - Insight Data Science (For PhDs only) <http://insightdatascience.com/>
 - Insight Data Engineering (For anyone!) <http://insightdataengineering.com/>
 - 7-8 week program, Ramesh is an alum, **FREE**

Where Do I Go From Here?

The Data Incubator <https://www.thedataincubator.com/>

- Can do in NYC, Washington DC, SF, or electronically.
- 7 weeks
- Free, but primarily geared towards PhDs

Start Your Own Company!

- GA recently partnered with 500 Startups <http://techcrunch.com/2015/03/25/general-assembly-and-500-startups-partner-for-accelerator-prep-program/#SUzvlP:4ESU>
- 500 Startups will accept at least 10 teams that feature a GA alumni
- “Successful applicants will receive \$8,000 in cash and a \$2,000 tuition waiver from 500 Startups in exchange for a 2% equity stake. Those companies that are accepted will also be fast-tracked for the 500 Startups accelerator”
- Apply [here!](#)

Own Opinion

- For most of you, you already have the skills to continue building your data science toolkit yourself
- There are so many resources out there
- Bootcamps are expensive
 - They do have value though so decide on the tradeoff (esp. if they are full-time)

Ways to Stay in Touch/Collaborate

- LinkedIn/Facebook
- Slack
- Alessandro's Job Posting Google Group
 - ask him for an invite
- Bay Area Data Science Facebook Group
 - courtesy of David Yerrington
 - <https://www.facebook.com/groups/bayareadatascience/>
- Study groups / Meetups!

Study Groups / Meetups

- My personal favorite
- **Open invite**, co-working space for data scientists
- Can discuss what we're working on, resources we can share with each other, hold workshops, and just hang out with other like-minded people
- Each week, one person can be the lead for a subject of his/her choice and teach the rest of us about that domain.

Study Groups / Meetups

- Biggest need will be coordination (when and where we'll meet). I'd be happy to be one of the co-leaders for this.
- We might be able to have a regular spot at GA on weekends (from Vanessa)
- Message me if interested! If Hipchat is deprecated after the class, we'll move to Slack :)

Thanks for a great class!
